Errata for "An Analysis of the Motion of Liquids in a Partially-Filled Enclosure"

27 August 2013

by C. P. Hoult

1. Additional symbols

$\bar{()}$ Laplace temporal transform of ()

$()'$ $\partial() / \partial x$

2. Modern values of the first three roots of eq. (5-23) are:

$\lambda_1 = 1.84118376$

$\lambda_2 = 5.33144277$

$\lambda_3 = 8.5363164$

3. In eq. (5-34), the hyperbolic sine in the denominator of the second summation should read:

$$\sinh \frac{\lambda_n}{a}\left(h + \frac{m}{\pi\rho a^3} \right)$$

4. In eq. (5-37) the square bracket in the leading factor's denominator should read:

$$\left[s^2 \cosh\left(\frac{\lambda_n m}{\pi\rho a^3} \right) + a_t \frac{\lambda_n}{a} \sinh\left(\frac{\lambda_n m}{\pi\rho a^3} \right) \right]$$

5. In eq. (5-41) in the first line on the top of page 30, the square bracket should read:

$$\left[s^2 \frac{a}{\lambda_n} \cosh\left(\lambda_n \frac{h}{a} \right) - a_t \sinh\left(\lambda_n \frac{h}{a} \right) \right]$$
